

HI LO Welding Gauge

- Hi Lo Welding Gauge MEASURES INTERNAL ALIGNMENT of pipe after fit-up / alignment, cuts radiographic rejects.
- Hi Lo Welding Gauge measures internal misalignment of pipe before and after tacking.
- Hi Lo Gauge Measurements read in standard one side, and metric on the opposite side.
- Changes from standard to metric, simply remove gauge body, turn scales over and replace body
- Measure internal misalignment before welding
- Measure fit-up gap of welding
- Measure bevel on end preparation
- Measure the crown height of welds
- Measure fillet weld size
- Measure scribe line, socket welds
- Measure scribe line, socket welds

Satisfy fit-up codes AWS, ASME, ANSI, API & MILITARY

High Quality, Durable, Accurate Welding Inspection Gauges made easy by GAL GAGE Co. USA

Part No. Description of Welding Inspection Gauge

GAL-1 Hi Lo Gauge
